

Model BG250

Package Handler

Features:

- ◆ Ideal for packaging & warehouse applications
- ◆ Capacity up to 250 lbs
- ◆ Grip stroke 14" for varying box widths
- ◆ Operates on 90 PSI plant air
- ◆ Balanced pivoting operator's handle
- ◆ Set-down safety prevents loads from dropping

With a capacity up to 250 lbs. and grip range of 14", the AIMCO Model BG250 Package Handler allows you to pick and place large boxes with ease!

Capable of handling boxes from 2-14 feet in length, the Model BG250 Package Handler provides secure pressure controlled grip using bonded urethane pads to avoid box distortion. The set-down safety assures that loads cannot be dropped. The zero gravity tilting handle bars allow the operator to work in a comfortable range as the tooling is raised or lowered.

The Model BG250 Package Handler is integrated with an air balancer and can be suspended from a work center bridge crane or an AIMCO articulated jib crane.

AIMCO Manufacturing can customize its standard designs of lift assist equipment to suit your application

AIMCO Lift Assist Technology

AIMCO Products

AIMCO custom designs and builds integrated lift assist systems and material handling equipment. AIMCO's experienced Engineering Department can customize AIMCO standard designs of lift assist equipment to suit your application. **A wide variety of material handling equipment is available:**

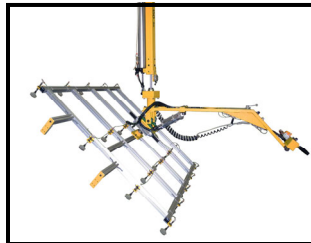

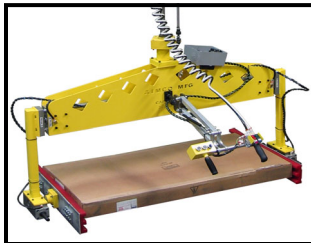

- ◆ Articulated Jib Cranes
- ◆ Portable Jib Cranes
- ◆ Articulated Lifting Arms
- ◆ Torque Arms
- ◆ Industrial Manipulators
- ◆ Machine Loading Systems
- ◆ Pneumatic Overload Circuit
- ◆ Vacuum Technology

Available Mounting Types:

- ◆ Floor Pedestal
- ◆ Overhead Ceiling
- ◆ Overhead Trolley
- ◆ Machine Base
- ◆ Wall Mount
- ◆ Column Mount

Custom End Effectors

AIMCO has extensive experience in the design and manufacture of end effector tooling, from simple configurations to the complex. AIMCO provides a variety of both standard and custom designed tooling to safely and efficiently handle any type of load.

End Effector Types Available:

- ◆ Pneumatic
- ◆ Vacuum
- ◆ Magnetic
- ◆ Manual
- ◆ Physical Clamping
- ◆ Any Combination

The AIMCO Advantage

- ◆ Increased Productivity
- ◆ Ease of Movement & Positioning
- ◆ Enhanced Operator Safety
- ◆ Reduced Operator Fatigue
- ◆ Improved Work Force Utilization
- ◆ Protection of Delicate Payloads
- ◆ Increased Quality
- ◆ Increased Profits
